Air-Fed Ensemble Overview

- **Product Performance Evaluation Concept**
- **Issues and Criteria for Air Fed Protective Ensembles – Angie Shepherd**
- **Concept for NIOSH Certification of Air Fed Ensembles – Colleen Miller**
- **Self-Contained Atmospheric Protective Ensemble (SCAPE)
Propellant Handlers Ensemble (PHE) -- Dennis Dudzinski (EG&G)**

Air-Fed Ensemble Product Performance/Evaluation Concept

- **Objective is to create criteria to ensure appropriate protection for a configuration where national standards do not currently exist**
- **NIOSH certification for the respiratory protection criteria will be based on the results of the respirator performance evaluation with and without the ensemble dermal protection performance evaluation**
- **Initial focus based on stakeholder interest will be air fed ensembles that are comparable to supplied air hoods currently certified under 42 CFR subpart J.**
 - **NIOSH certification for respiratory performance would be under this subpart**
 - **Approval for protective characteristics would be based on National consensus standards**
- **Compliance with the appropriate subparts of 42 CFR Part 84 will be required regardless of the evolution of the ensemble performance criteria**

Air-Fed Ensemble Product Performance/Evaluation Concept

- Present:

- Respiratory Protection

- Compliance with appropriate 42 CFR Part 84 subpart
 - Additional requirements per para. 84.60(b) and para. 84.63(c)
 - Reasonable test standard need to be developed for CO2 buildup in suit
 - Reasonable test standard must be developed for ensemble TIL

- Dermal Protection

- ASTM (2009) or other SDO consensus standards

- Future (circa 2012 and beyond):

- Respiratory Protection

- Compliance with appropriate updated 42 CFR Part 84 subparts
 - Air Fed Ensemble Module
 - SAR Module
 - PAPR Module
 - SCBA Module(s)
 - Additional requirements per para. 84.60(b) and para. 84.63(c)

- Dermal Protection

- ASTM or other SDO consensus standards
